PACKING WORK & MATERIALS

SEARCHING MATERIAL'S GOOD,
DRIVING UNIQUE DEVELOPMENT.

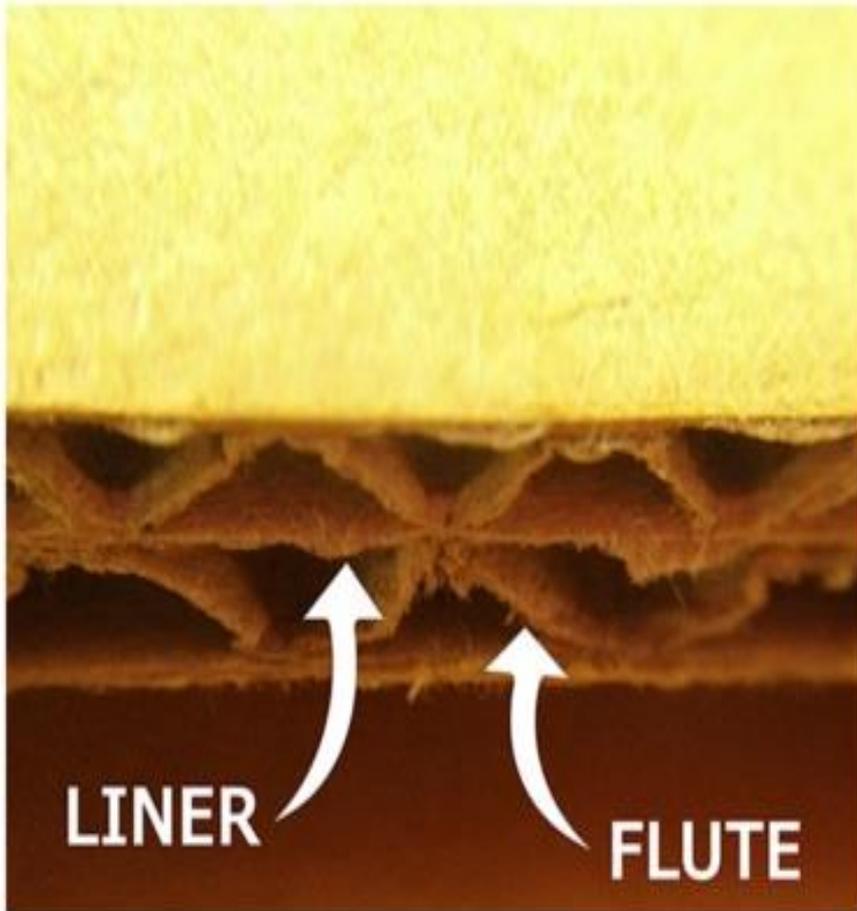

We study cardboard, the material, to find identity and essence which can solve problem and useful for various fields, and also research for new application and possibility all the time.

We are doing research delicately to find every possible, such as recycle cardboard, lighter weight, easier procession, heat-retention, and inexpensiveness, which could develop our products and share to the world. Now we are starting a challenge that combines our projects together, creating brand new applications, and also constructing system planning tools that made by various lasted machines to answer your order and request. We can make visual & color design, prototype model, or small lot as fast and freely as you ask for.

Fast Planning and Develop Product by CAD/CAM.

PACKING WORK & MATERIALS

Construction and Type of Cardboard

Cardboard is made of paper which we call "flute", corrugate that looks like mountains line, and "liner" that stuck with mountain's line. Flute plays part of strength that absorbs impact and pressure from outside. Normally, there are 3 type of its structure, but we can design how strength or buffer of cardboard we want by flute's height, liner, or corrugate combining.

One Side Cardboard

Liner stuck with one side of flute.

Two Side Cardboard

Liner stuck with both side of flute.

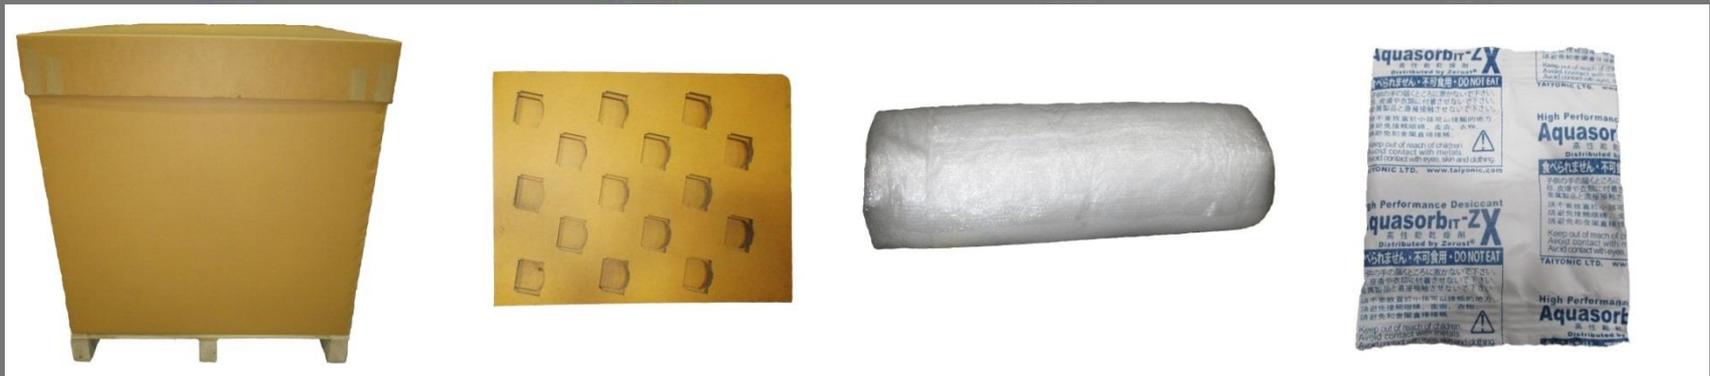

Multiple Two Side Cardboard

Make of 2 layers of flute and 3 layer of liner.

PACKING WORK & MATERIALS

PACKAGING MATERIALS

Suggestions to suit the application from returnable box, bar station, steel carriage of plastic corrugated sheet specification to sales of the plastic container, palette, dunnage.

Carton
